Address: 6836 Creekwood Ct., Clarksville, MD 21029

Telephone: 443-889-6531

Product Name: InteropX EHR Solution Version 1.5.3

Product Introduction:

InteropX (iX) EHR Solution is designed to enable Cure Act compliance and certification for single or multi-tenant EHR software. iX EHR Solution bolts-on to the EHR software to seamlessly augment its capabilities including:

-   Certified FHIR Façade and FHIR Server APIs
-   SMART on FHIR API
-   Single or multi-patient (Bulk) API
-   Single and Multi-tenant Support
-   Authorization Services
-   Auditing Services
-   Data Mapping and Transformation
-   Time Synchronization

All these capabilities seamlessly integrate with the EHR system without requiring any heavy lifting or development effort by the EHR software vendor

iX EHR Solution is based on the mandated US Core Data for interoperability (USCDI). Once the iX EHR Solution is integrated, configured, and tested, the InteropX team will support the certification testing of the EHR software.

Cost Transparency

The cost of all certified functionality of the iX EHR Solution is included in the annual licenses fee which includes the cost for initial integration with an EHR software, annual subscription, and technical support. There are no additional costs that are not included in the annual iX EHR Solution license fee.

Capability	Description of Capability	Cost or Fees
170.315(d)(1) Authentication, Access Control, and Authorization	InteropX iX EHR Solution implements the Privacy and Security capabilities for all certified criteria. The product also contains functionality (either native or 3rd party relied upon software) and would have previously demonstrated through live testing	Included in the product license cost. No additional costs or fees required.
170.315(d)(9) Trusted Connection	InteropX iX EHR Solution implements Transport-Level security: Establishing a trusted connection in accordance with the standards specified at §170.210(a)(2) and §170.210(c)(2)	Included in the product license cost. No additional costs or fees required.
170.315(d)(10) Audit Actions on Health Information	InteropX iX EHR Solution conforms to the 2015 Edition Cures Update 170.315(d.10) requirements and is compliant with ASTM-18 Sections 7.1.1, 7.1.2 and 7.1.6 through 7.1.9.	Included in the product license cost. No additional costs or fees required.
170.315(d)(12) Encrypt Authentication Credentials	InteropX iX EHR Solution provides Encrypt Authentication Credentials functionality	Included in the product license cost. No additional costs or fees required.
170.315(d)(13) Multi-Factor Authentication	No, the InteropX iX EHR Solution does not support the authentication, through multiple elements, of the user's identity with the use of industry-recognized standards	Included in the product license cost. No additional costs or fees required.
170.315(g.4) Quality Management System (QMS)	InteropX conforms to the QMS requirements/criterion outlined in 170.315(g.4)	Included in the product license cost. No additional costs or fees required.
170.315(g)(5) Accessibility-Centered Design	No, the InteropX iX EHR Solution does not use Accessibility-Centered Design (ACD) Process	Included in the product license cost. No additional costs or fees required.
170.315(g)(10) Standardized API for Patient and Population Services	InteropX iX EHR Solution meets the following requirements: • Refresh tokens are available that are valid for at least three months. • Does not cache the JWK Set received via a TLS-protected URL for longer than the cache-control header received by an application indicates	Included in the product license cost. No additional costs or fees required.
